A
Strongest within-L5 association
ρ = -0.19, p = 0.036, n = 126
Rheobase (pA)
Plasticity score (IEG, z within L5)
L5 IT (n=77)
L5 ET (n=49)
B
Within L5 (n=126): nothing survives FDR
shaded band: |ρ| < 0.25, below the detection floor at 80% power
Input resistance
AP threshold
AP width
Resting Vm
ISI adaptation
Spike freq. adapt.
Rheobase
